

Institut Teknologi Sepuluh Nopember

Institut Teknologi Sepuluh Nopember (ITS) Surabaya was founded in 1961. It consists of 5 faculties offering courses and research in sciences and technologies. Currently ITS has more than 17,000 students. ITS is located at the Eastern are of Surabaya, occupying a large area totaling 180 hectares as its main campus in Sukolilo sub-district. Not only does ITS provide advantages for both excellent scientific activities and pleasant natural life environment, but is also has a very friendly atmosphere and enormous community spirit.

The institute has long been maintaining its reputation for innovative and proactive relationships with industry and the public services. Recognized as one of the best technological universities in Indonesia, ITS offers great and challenging career prospects to its graduates. In addition, the involvement of ITS in various social and community projects have proven its concerns and commitment to the community development

About Surabaya

Surabaya is the capital of East Java province and Indonesia's second-largest city with a population of over 2.7 million. It is located on the northern shore of East Java at the mouth of Mas River and along the edge of the Madura Strait. Surabaya is the main seaport and commercial center in the eastern region of Indonesia. To Indonesians it is known as "the City of Heroes" due to the importance of the Battle of "Sepuluh Nopember" during the Indonesian Independence Wars.

As the main seaport and commercial center in the eastern region of Indonesia, Surabaya has become one of the largest cities in Southeast Asia. It is also famous for many landmarks such as; Tugu Pahlawan (Heroes Monument), Suro dan Boyo (Surabaya City's Symbol), Suramadu Bridge (The longest bridge in Indonesia) and many more. There are also many cities and towns surrounding Surabaya which can provide as a recreation or a study destination.

Learning Indonesian Language and Cultures (W S)

Falling in love from the first sight would be the must-have-experience as soon as participants complete this program. A two-week stay in the city will bring participants hands-on experiences to speak the language and to understand the culture. Experience the weather, feel the exotic taste of the typical culinary, deem the beauty of the panorama and sense the hospitality of the people will be another package. Centre for Languages and Cultures (CLC) ITS presents this unforgettable immersion through learning the Indonesian language under friendly atmosphere and studying the cultures of Indonesia. The teaching and learning processes are designed in such a way that a combination between learning and doing is simultaneously presented to make participants survive with daily tasks in a relatively short time course, and to enable them visit some worth seeing places in town to meet people and to enjoy the scenery.

Period : 13-26 January 2014, 16-29 June 2014
Minimum Participants : 4
Course Fee : US\$930/person
 10% disc. given to the first registrar on each term

Sustainability in Developing Countries (W)

In this decade Sustainable Development (SD) has been becoming a growing concern all over the world. Not only becoming a topic in many conferences, symposiums, and discussions, SD has also been becoming the core of many programs and development projects. In this winter program, the multiple facets of SD will be discussed and the implementations of SD in developing countries like Indonesia, including sustainable agriculture, sustainable energy, sustainable transportation, sustainable building, sustainable tourism, sustainable life style, sustainable packaging, and sustainable product, will be explored and analysed. This winter program is designed to suit either bachelor or master students with or without specific knowledge in SD. Participants can take this program under credit or non-credit mode. The difference between those two modes is just the assignments, the rest is just fun, rewarding, and life-changing experiences.

Credit : 2 Credits (optional)
Date : 13-27 January 2014
Course Fee : US\$1.800/person (10% discount will be given to the first 5 participant)
Minimum participants : 10
Contact : Dr. Maria Anityasari (sustainability.its@gmail.com)
Level : Bachelor or master students with or without specific knowledge in the area of SD

Exploring Biodiversity of Baluran, Indonesia (S)

Baluran National Park is located at East Java Indonesia. It is a miniature of Indonesia's forests that has a tropical rainforest and coral reefs. The most unique ecology in this region is a savannah that covers approximately 40% of Baluran. Thousands of exotic birds, Java bulls, east deers, wild buffaloes, wild boars, forest dogs, and leopards are parts of this wonderful national park. This summer program will be held by the Dept of Biology ITS and will explore marine ecology and botany. Participants can taste the exotic Baluran beach and enjoy snorkeling, diving, fishing, bird watching, and discover the fascination of Indonesian mangrove. The 1st and 2nd days will be dedicated for class activities while the rest will be for field trip. Participants will be divided into several research groups, in which each group will do fun activities to experience and understand marine ecology and botany of Baluran.

Period : 20-26 June 2014
Course Fee : US\$1.500/person
Minimum Participants : 15

Level : Undergraduate Students

(S) = Summer Program (W) = Winter Program

Treasures of the 13th Century East Java's Majapahit Kingdom (S)

The Dept of Design ITS is delighted to offer a fascinating summer program that consists of 4 days of nature and cultural trips followed by 4 days of art, craft and design workshops. One day trip to discover the vibrant heritage of Surabaya City including the legendary House of Sampoerna Museum of cigarettes, Sunan Ampel Mosque and its little Arab community, the house of batik, the latest landmark of Surabaya city – the Suramadu Bridge, will be just the opening. The following trips to the ruins of the Majapahit Kingdom (1293–1527) and to the glass beads home industry community in Jombang will give a completely new experiences. Participants will stay 2 nights at the serene and beautiful Vila de'Desa with its distinctive vernacular design situated in mountainous area of Pacet. Between the trips participants will attend some workshops on glass beads, batik, traditional packaging making, jewelry and will explore the art, craft, design concepts, materials, tools and cultural aspects behind its production.

Period : 20-28 June 2014
Course Fee : US\$2.500/person
Minimum Participants : 5

Level : Undergraduate Students (No design background preferred)

Green Industry & Green Business: Opportunities & Challenges (S)

Nowadays greenish is required in many areas including industries and businesses. Not only regulated by government, greenish is also required by customers and supply chain especially in developed countries. Therefore, it is a must for young generation to understand multi aspects of greenish and to be able to implement those aspects comprehensively and thoroughly in industrial daily operations. Moreover, green concepts should also trigger ideas for new ventures and new businesses. This summer program consists of two sections. The first section will elucidate the root concepts of greenish in industry as well as the methods and tools to implement those concepts. A series of industrial practices will be analyzed and discussed. Not only that, participants will also visit several companies to learn from the first hand. The second section will focus on creating new green businesses. Participants will be assisted to generate some green business ideas from their living context. After assessing the generated ideas, participants will be guided to develop a competitive business plan on green business. Participants can take this program under credit or non-credit mode

Credit : 2 Credits (optional)
Date : 4-17 August 2014
Course Fee : US\$2.000/person (10% discount will be given to the first 5 participant)

Minimum participants : 10
Level : Bachelor or master students with or without specific knowledge in the area of SD

Community Based Sanitation in Urban & Rural Areas (S)

Currently, around 40% of Indonesian population still practice open defecation. This poor condition is far away from Millenium Development Goals (MDGs) target which is to provide proper access to sanitation for 60% Indonesian by 2015. East Java as one of 33 provinces in Indonesia is the most populated province of more than 39 million people by 2013. As sanitation demand and enabling environment are getting better in the last 10 years in this province, there are many sanitation best practices worth studying. The Department of Environmental Engineering with the Research Centre of Community Empowerment of ITS has been working for more than 8 years to encourage local communities to have their own sanitation facilities. In this summer program lesson learnt from many projects involving international donors, universities partners, local government as well as different appropriate technologies will be presented and explored.

Period : 17-24 August 2014
Course Fee : US\$900/person
Minimum Participants : 15
Contact : Alia Damayanti
Level : Undergraduate Students (no specific background required)

Community and Technological Camp (CommTECH) Highlight 2014

Repeating the success of 2012 and 2013 CommTECH Camp – Highlight, this year ITS offers a highlight program again to provide participants a great opportunity to learn the ITS's expertise and technology implementations in the society while visiting, discovering, and experiencing Indonesia's diverse heritage and culture. This highlight program will cover Indonesian language course, traditional music and dance, community development, visits to main tourist attractions, and much more.

Schedule

Eligibility, Registration Fee, and Facilities

This "Highlight Program" is open for 40 overseas students, academics, and professionals with any academic background. No specific technical/practical skills required to join the program. With various unforgettable activities offered in 9 days, the investment to join this program is very affordable, i.e. USD 1,500,- per participant.

The investment includes airport pick-up and drop-off, accommodation and meals for 10 days (except for few dinners in the free time specified in the detailed schedule), scheduled local transportation, course materials, workshop tools & materials such as cotton fabrics, canting, wax, and dye for batik production practice. Detailed schedule can be viewed at www.international.its.ac.id. It is recommended that all participants arrange their own health insurance prior to the departure.

Application and Scholarships

- The course will be run from 25th August – 2nd September 2014.
- The registration will be opened from 1st March to 31st July 2014. The registration form can be downloaded at www.international.its.ac.id.
- Full scholarship will be provided for the first 10 registered participants from different institutions.
- Partial scholarship (up to 50%) will be provided for 20 participants from different institutions.
- Successful participants will be given notice by email no later than 1st August 2014.
- Participants who have to pay full or partial registration fee are requested to pay the fee no later than 10th August 2014.
- Acceptance letter or invitation letter will be provided for visa arrangement.
- For further enquiries, please contact Mr. Wahyu at international@its.ac.id
